# Xpert RTD

IRTD Display Interface Unit

+ *XpertRTD® is a stand alone display and interface between smart probes and Lives International Systems*
+ *User selectable: engineering units display in °C, F, K and Ohm*
+ *Automatic address detection of the smart probes*
+ *RJ connector to Smart Probe / connectable to Validator*
+ *USB / radio frequency signal transmission to XpertLog® systems*

Stand alone display and interface between smart probes and Lives International Systems:

- user selectable engineering units display: °C, F, K and Ohm

- calculates and displays the minimum and maximum temperature values

- USB connection to XpertLog® systems

- radio frequency signal transmission to XpertLog® systems

- radio frequency transmission: 2.4 GHz

- wireless range: 121m (400 feet) line of sight

- automatic address detection of the smart probes

- weight 300 g (10.58 oz)

- RJ14 connection to Smart Probe / connectable to Validator

- power supply 12 V DC

<u>Order Refference</u>
